

# VKJP 01010

Product Information - Gennaio 2015

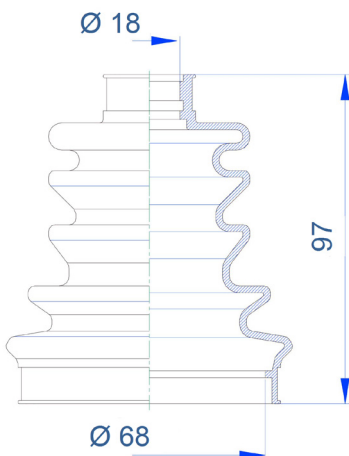

Autovettura

Informazione tecnica: VKJP 01010

VKJP 01010 - Semi-universal boot kit is similar to the OE boot shape. There is no need to cut to size for small and big diameter, as per SKF Universal Boot kits.

**Note:** cuffie per giunti omocinetici con diametro fino a 80 mm, no per giunti trilobati.

La cuffia VKJP 01010 è in nitrile, materiale elastico, che consente il montaggio con l'utilizzo dello strumento VKN 402, senza dover smontare il giunto dal semiassie.

Expander: VKN 402

Per una riparazione professionale, per il serraggio delle fascette si raccomanda l'utilizzo dello strumento SKF VKN 400. Un serraggio non corretto può causare la rottura prematura del giunto omocinetico!

Strumento di serraggio: VKN 400
