VKDP XXXXX T Different OE numbers

Please take into account that some dust covers inside Strut Protection Kits (VKDP) are made of Natural Rubber that is a resistant material used to produce Original Equipment parts. For this type of rubber, a paraffin wax is added in the material for ozone protection, therefore dust covers might have a "white dust" appearance that is completely normal and it is not related to the quality of the parts. This appearance is also normal in the OE suspension parts made with natural rubber.

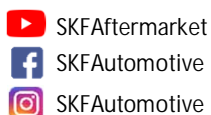

Example of dust cover appearance with wax paraffin
