

MEYLE-PD: Advanced performance and design.
Performance, comfort and longevity

Maximum braking performance:

- New friction materials for excellent and consistent friction coefficient as well as quick and excellent responsiveness

Short bedding-in time:

- Individualised friction materials and special brake pad coating* leads to short bedding-in time

Silent performance:

- Additional adhesive between shim and backing plate guarantees better bonding and leads to increased damping properties to reduce noise
- Individual anti-noise shims, chamfers and slots designed for each pad to support silent performance and prevent vibration

Cleaner wheels:

- Advanced friction materials leads to less brake dust development

Meets and outperforms highest quality standards:

- Meets and exceeds ECE R90 regulation
- Free of heavy metal and copper

MEYLE-PD advantage:

- MEYLE-PD brake pads deliver maximum braking performance with a short bedding-in time while operating silently and keeping wheels clean

[*depending on friction material]
