EN

Fuel filter

For Hyundai and Kia applications only: vehicles manufactured from (approximately) the 2006 model year were fitted with a fuel filter that had a smaller-diameter threaded recess for the water sensor.

The water sensor recess of ADG02342 measures M8 x 1.25.

If the vehicle is fitted with a larger water sensor/drain screw, a new water sensor with a modified design is required. This is only available from an OE parts supplier.

The OE part numbers for the water sensors are as follows:

Kia = 0K52A-23-430

Hyundai = 31396-H1950
